Work Experience

Software Engineer

Crown Interactive

April 2023 - present

Crown Interactive is a technology software company that provides innovative business and system process solutions to customer centric organizations around the world. Their products include: Workflow manager, Unified Collection Gateway, Customer Management and billing, Inventory Management System and a few others.

- I worked on the Sign-up feature on the CICOD website.
- I consumed geolocation api for the phone feature on Cicod website which enables the default country to be where ever the user is, without having to select their country from the filter.
- Worked on the frontend of 1Government cloud website which happens to be for one of our client's company. By building the landing page, admin , Login page. I also integrated some apis that enhances the routing to other features like the Workflow management system for the company and Inventory management system.

Frontend Engineer Intern

Onhova

January 2023 to April

Onhova is a solution that enables business owners to create an e-commerce site in less than a minute on mobile phones and laptops. Business owners can upload products and then get a personalized link to share with potential customers and on social media platforms to view products, make orders and receive payments. In addition, inventory management, ordering management online and offline, customer management, and promotions are some of the benefits.

Tools: Javascript, ReactJs, Next.js, Bitbucket, Styled-components, redux-toolkits.

- I worked on the collection of products feature, where vendors can create, edit and delete a collection.
- I worked on the shipping profile feature where vendors can create different shipping zones and costs in a shipping profile.
- Implemented Onhova's back-office the ability to view all Onhova products. Worked on the edit and add product phases as well.

Tools: Typescript, reactJs, bootstrap, styled-components, redux-toolkits.
